
Ahmad Issa

GIS Developer | Web GIS Developer | Technical Support Engineer
Building ArcGIS-based web applications and supporting enterprise Esri platforms for government and corporate clients.

+962 79 111 8973 · ahmedsalemghaleb@gmail.com · Amman, Jordan - Dubai, UAE (Hybrid) · Portfolio · LinkedIn · BCs Computer Engineering · UAE University · Single · 27/05/2002

PROFESSIONAL SUMMARY

ArcGIS Experience Builder | ArcGIS Maps SDK for JavaScript 4.x | ArcGIS Online | ArcGIS Enterprise | Web Maps | Feature Layers | ArcGIS REST Services | Web GIS Development | JavaScript | TypeScript | React.js | SaaS/PaaS Support | Incident & Escalation Management | RCA & Log Analysis | REST API Integration | Authentication & Access Control | SQL Server | PostgreSQL | Technical Documentation

KEY COMPETENCIES

SaaS Platform Configuration & Support | Complex Case Ownership & Escalation Management | Cross-Module & Workflow Troubleshooting | Business Process Analysis & System Alignment | Customer Onboarding & Implementation Support | Incident, Problem & Root Cause Analysis | SLA-Driven Case Prioritization & Resolution | Client Training & Technical Enablement | Knowledge Base Documentation & Internal Support | Cross-Team Collaboration (Product & Engineering) | Live Client Troubleshooting & System Diagnostics

PROFESSIONAL EXPERIENCE

Gistec (Esri's Exclusive Distributor) — 2024- Present

Geographic Information System Developer

- Build GIS applications and Web GIS workflows using ArcGIS technologies, JavaScript, HTML5, and modern frontend patterns.
- Develop and customize ArcGIS Experience Builder apps and widgets connected to Web Maps, Feature Layers, and ArcGIS services.
- Integrate REST APIs and GIS services to support map interaction, filtering, dashboards, and spatial data visualization.
- Support maintainable UI and component patterns aligned with real client workflows and Esri platform behavior.

Technical Support Engineer

- Supported Esri Support Center workflows for ArcGIS Online, ArcGIS Enterprise, access, services, data, configuration, and user issues.
- Troubleshot incidents using logs, service responses, authentication behavior, permissions, and customer workflows.
- Managed tickets with SLA-driven prioritization, escalation coordination, root cause analysis, and case documentation.
- Produced technical guidance and knowledge-base notes for recurring issues and support consistency.

Web Developer

- Developed responsive web interfaces and custom ArcGIS Experience Builder widgets using HTML, CSS, JavaScript, React, and TypeScript.
- Integrated ArcGIS REST services and external APIs for interactive maps, dashboards, filters, and real-time data display.
- Refactored frontend components to improve maintainability, performance, and reuse across GIS applications.
- Collaborated with GIS, product, and implementation teams on government and enterprise application delivery.

United Arab Emirates University — Jun 2022 - Sep 2024

Researcher

- Participated in university research projects with faculty and instructors, including UAEU SURE+ project work.
- Co-authored AI Virtual Assistant for Vehicles research presented/published through ASET Conference, Dubai, 2025.
- Designed a Smart City Optimization Platform using IoT and machine learning concepts; ranked Top 10 graduation projects at UAEU.

EDUCATION

Bachelor's degree in computer engineering from United Arab Emirates University (2020-2024)

ACADEMIC PROJECTS & RESEARCH

- **AI Virtual Assistant for Vehicles** – Co-authored an IEEE-published research project evaluating an AI-driven in-vehicle virtual assistant designed to improve driver attentiveness, response time, and safety compliance using multimodal interaction and simulated driving experiments (ASET Conference, Dubai, 2025).
- **Smart City Optimization Platform** – Designed an IoT and machine learning–based solution for urban planning and optimization; ranked Top 10 graduation projects at UAEU.

TECHNICAL SKILLS

- SaaS & PaaS Application Support
- Enterprise Application & Platform Troubleshooting
- Incident, Problem & Escalation Management
- Root Cause Analysis (RCA)
- System Monitoring & Log Analysis
- API & Integration Troubleshooting
- Authentication & Access Control (SSO, Token-Based, OAuth)
- Database Connectivity & Data Stores (PostgreSQL, SQL Server)
- Network Troubleshooting (DNS, Ports, Firewalls, VPN)
- Windows & Linux Server Administration
- Performance & Reliability Diagnostics
- Ticketing Systems & SLA Management
- Live Remote Troubleshooting & Screen Sharing
- Technical Documentation & Knowledge Base Authoring
- HTML5, CSS (SCSS, SASS)
- JavaScript, TypeScript
- React.js
- Python
- REST APIs
- Git
- Visual Studio Code
- Jupyter Notebook / Anaconda
- Cisco Packet Tracer
- Microsoft Office Suite
- ArcGIS Experience Builder
- ArcGIS Online
- ArcGIS Maps SDK for JavaScript
- ArcGIS REST Services
- Web Maps, Feature Layers
- Web GIS Application Development
