

Ahmad Issa

Full Stack Developer | Web GIS Specialist

Building responsive web applications, scalable interfaces, and practical systems with GIS and Esri experience as a specialty.

+962 79 111 8973 · ahmedsalemghaleb@gmail.com · Amman, Jordan - Dubai, UAE (Hybrid) · [Portfolio](#) · [LinkedIn](#) · BCs Computer Engineering · UAE University · Single · 27/05/2002

PROFESSIONAL SUMMARY

Frontend Engineering | Full Stack Development | React Component Architecture | TypeScript | JavaScript | REST API Integration | Responsive UI | Accessibility | Debugging | Performance | Web GIS Applications | ArcGIS Experience Builder | ArcGIS REST Services | Production Support | RCA | Technical Documentation | Client Delivery | ArcGIS Maps SDK for JavaScript 4.x | ArcGIS Online | ArcGIS Enterprise | SaaS/PaaS Support | SQL Server | PostgreSQL

KEY COMPETENCIES

SaaS Platform Configuration & Support | Complex Case Ownership & Escalation Management | Cross-Module & Workflow Troubleshooting | Business Process Analysis & System Alignment | Customer Onboarding & Implementation Support | Incident, Problem & Root Cause Analysis | SLA-Driven Case Prioritization & Resolution | Client Training & Technical Enablement | Knowledge Base Documentation & Internal Support | Cross-Team Collaboration (Product & Engineering) | Live Client Troubleshooting & System Diagnostics

PROFESSIONAL EXPERIENCE

Gistec (Esri's Exclusive Distributor)

2024- Present

Full Stack Developer

- Build responsive web applications and workflow tools using HTML5, CSS, JavaScript, TypeScript, React, REST APIs, and reusable UI patterns.
- Develop custom ArcGIS Experience Builder widgets and Web GIS interfaces connected to Web Maps, Feature Layers, and ArcGIS REST services.
- Integrate APIs and external services for dashboards, filters, data views, and operational workflows.
- Translate client requirements into clean interfaces, maintainable components, and production-ready features.
- Apply GIS, Esri platform, and support experience to diagnose delivery issues and improve application reliability.

Technical Support Engineer

- Supported Esri Support Center workflows for ArcGIS Online, ArcGIS Enterprise, access, services, data, configuration, and user issues.
- Troubleshot incidents using logs, service responses, authentication behavior, permissions, and customer workflows.
- Managed tickets with SLA-driven prioritization, escalation coordination, root cause analysis, and case documentation.
- Produced technical guidance and knowledge-base notes for recurring issues and support consistency.

Web Developer

- Developed responsive web interfaces and custom ArcGIS Experience Builder widgets using HTML, CSS, JavaScript, React, and TypeScript.
- Integrated ArcGIS REST services and external APIs for interactive maps, dashboards, filters, and real-time data display.
- Refactored frontend components to improve maintainability, performance, and reuse across GIS applications.
- Collaborated with GIS, product, and implementation teams on government and enterprise application delivery.

United Arab Emirates University

Jun 2022 - Sep 2024

Researcher

- Participated in university research projects with faculty and instructors, including UAEU SURE+ project work.
- Co-authored the IEEE-published conference paper "Evaluating a Virtual Assistant's Effectiveness in Enhancing in-Vehicle Safety: A Comparative Study", published in ASET 2025, DOI: <https://doi.org/10.1109/ASET66891.2025.11427955>.
- Designed a Smart City Optimization Platform using IoT and machine learning concepts; ranked Top 10 graduation projects at UAEU.

EDUCATION

Bachelor's degree in computer engineering from United Arab Emirates University (2020-2024)

ACADEMIC PROJECTS & RESEARCH

- **Evaluating a Virtual Assistant's Effectiveness in Enhancing in-Vehicle Safety: A Comparative Study** – Co-authored the IEEE-published conference paper “Evaluating a Virtual Assistant's Effectiveness in Enhancing in-Vehicle Safety: A Comparative Study”, published in ASET 2025, DOI: <https://doi.org/10.1109/ASET66891.2025.11427955>.
 - **Smart City Optimization Platform** – Designed an IoT and machine learning–based solution for urban planning and optimization; ranked Top 10 graduation projects at UAEU.
-

TECHNICAL SKILLS

- | | |
|--|-----------------------------------|
| • SaaS & PaaS Application Support | • HTML5, CSS (SCSS, SASS) |
| • Enterprise Application & Platform Troubleshooting | • JavaScript, TypeScript |
| • Incident, Problem & Escalation Management | • React.js |
| • Root Cause Analysis (RCA) | • Python |
| • System Monitoring & Log Analysis | • REST APIs |
| • API & Integration Troubleshooting | • API Integration |
| • Authentication & Access Control (SSO, Token-Based, OAuth) | • SQL Server |
| • Database Connectivity & Data Stores (PostgreSQL, SQL Server) | • PostgreSQL |
| • Network Troubleshooting (DNS, Ports, Firewalls, VPN) | • Python |
| • Windows & Linux Server Administration | • Git |
| • Performance & Reliability Diagnostics | • ArcGIS Online |
| • Ticketing Systems & SLA Management | • ArcGIS Maps SDK for JavaScript |
| • Live Remote Troubleshooting & Screen Sharing | • ArcGIS REST Services |
| • Technical Documentation & Knowledge Base Authoring | • Web GIS Application Development |
