# Ahmad Issa

## Full Stack Developer

Amman, Jordan | +962 79 111 8973 | ahmedsalemghaleb@gmail.com
LinkedIn | Portfolio

### PROFESSIONAL SUMMARY

Full Stack Developer building web and GIS applications and LLM tool-calling agents with React, TypeScript, .NET, and Node.js. Extensive experience applying AI tools and models, coordinating agents, and automating workflows, plus enterprise troubleshooting at the Esri Support Center EMEA.

### TECHNICAL SKILLS

**Frontend:** React, TypeScript, JavaScript, HTML5, CSS/SCSS, Vite, Tailwind CSS, responsive UI, Arabic/English localization and RTL layouts.

**Backend and data:** C#, ASP.NET Core, Node.js, NestJS, Express, REST APIs, Entity Framework Core, SQL Server, PostgreSQL, Prisma, Python.

**GIS:** ArcGIS Experience Builder, ArcGIS Maps SDK for JavaScript, ArcGIS Online, ArcGIS Enterprise, ArcGIS REST services, web maps, feature layers.

**Testing and delivery:** Vitest, React Testing Library, MSW, xUnit, Jest, Git, GitHub, Azure DevOps/TFS, IIS, WPF/.NET, Swagger/OpenAPI.

**AI tools and automation:** LLM tool calling, OpenAI Codex, Claude Code, Antigravity, prompt engineering, context engineering, agent orchestration, n8n prototypes, Model Context Protocol (MCP).

### PROFESSIONAL EXPERIENCE

**Full Stack Developer**
gistec | Amman, Jordan | Apr 2026 - Present

- Developed a bilingual audit service and React/TypeScript console using ASP.NET Core, EF Core, and SQL Server, combining ArcGIS Portal webhooks and audit logs into a searchable, paginated activity history.
- Migrated persistence from SQLite to SQL Server and added LocalDB-based xUnit tests for database behavior and migrations. Implemented webhook signature checks, event deduplication, and user attribution.
- Created an isolated Vitest and React Testing Library suite for an existing React application, recording 458 passing tests across 19 files and 97.44% statement coverage. Reported 13 defects to the owning developers.
- Extended Experience Builder service-request workflows with shared status rules, synchronized map and table filters, assignment controls, and PDF certificate fixes.
- Enhanced a C#/.NET WPF asset-management application with ArcGIS pagination beyond 2,000 records, attachment fixes, cached searches, and cancellable data loads. Delivered MSI installer releases.
- Assessed frontend and backend authentication, authorization, credential handling, and sessions. Prepared remediation plans and investigated differences between source, release packages, and deployed files.
- Coordinated AI agents across implementation, testing, and documentation using structured prompts, shared context, and reviews across AI systems. Validated generated code through tests and application checks.
- Built an Excel-backed web directory with search, filters, record comparison, saved shortlists, and printable meeting briefs for a dataset of 2,208 organizations.

**Technical Support Analyst**
gistec | Esri Support Center EMEA | Sep 2025 - Apr 2026

- Supported ArcGIS Online and ArcGIS Enterprise customers, diagnosing service, data, configuration, authentication, and permission issues through log analysis and API responses.
- Prioritized support tickets against service-level agreements, coordinated escalations, and documented root causes, resolution steps, and reusable technical guidance.
- Earned multiple "Excellent" customer satisfaction (CSAT) survey ratings, with clients recognizing rapid diagnosis, clear root-cause explanations, and practical ArcGIS troubleshooting guidance.

## PROFESSIONAL EXPERIENCE (CONTINUED)

### Web Developer

gistec | Amman, Jordan | Sep 2024 - Aug 2025

- Developed responsive web interfaces and custom ArcGIS Experience Builder widgets using React, TypeScript, JavaScript, HTML, and CSS.
- Integrated ArcGIS REST services and external APIs for interactive maps, dashboards, filters, and operational data views.
- Refactored reusable frontend components and translated client requirements into application features with GIS and implementation teams.

### Researcher

United Arab Emirates University | Al Ain, UAE | Jun 2022 - Sep 2024

- Contributed to faculty research projects, including the UAEU SURE+ program and research on in-vehicle virtual assistants.
- Designed a smart city optimization platform using Internet of Things (IoT) and machine learning concepts, ranked among UAEU's Top 10 graduation projects.

## SELECTED PROJECTS

### AI Assistant for ArcGIS Experience Builder

gistec, proof of concept | Oct - Nov 2026

- Built an English and Arabic LLM agent as a custom Experience Builder widget in React and TypeScript, extending an open-source widget from 8 to 27 tools over a dataset of 240,000 land plots.
- Restricted the model to selecting tools: the widget validates each request against the live layer schema, queries ArcGIS feature services, and computes the statistics.
- Added a search for adjacent plots that total a requested area; expanded the Jest suite to 312 tests.

### Retail and Inventory Application

Personal project, under development | 2025 - 2026

- Built a React/TypeScript storefront and NestJS backend with PostgreSQL and Prisma, covering product variants, branch inventory, search, filtering, cart state, and persistent order records.
- Implemented read-only integration with an external inventory platform through paginated imports, scheduled synchronization, duplicate-safe transaction updates, and database migrations.
- Added server-side checkout validation for pricing, discounts, shipping, and cached branch stock, with idempotency keys to prevent duplicate orders. Documented APIs with Swagger/OpenAPI and added frontend, backend, and API tests.

## EDUCATION

### Bachelor of Science in Computer Engineering

United Arab Emirates University | Al Ain, UAE | 2020 - 2024

## PUBLICATION

Co-author, "Evaluating a Virtual Assistant's Effectiveness in Enhancing in-Vehicle Safety: A Comparative Study." 2025 Advances in Science and Engineering Technology International Conferences (ASET), IEEE.

DOI: 10.1109/ASET66891.2025.11427955

## TRAINING AND CERTIFICATES

Esri web courses and ArcGIS Lab completion certificates | Oct - Nov 2025

Support Services: Enterprise Geodatabase Troubleshooting | Oct 2025

ArcGIS Survey123 Basics, Creating and Publishing Surveys, and Create a Survey Using ArcGIS Survey123 Connect | Oct - Nov 2025

Collecting and Visualizing Data with ArcGIS QuickCapture | Nov 2025

Telling Stories with GIS Maps | Nov 2025
